

ALPHA SOLWAY TO LAUNCH NEW FOLD FLAT RESPIRATOR & ON-LINE GARMENT BUILDER AT THIS YEARS SAFETY & HEALTH EXPO

At this years Safety & Health Exhibition at ExCel, London (17th – 19th June 2014), Alpha Solway are proud to be launching their brand new **C-Series** mask, a fold flat respirator with exciting new features, whilst there will also be the chance to design your very own bespoke chemical garments with their inspirational **chem cre8** web tool.

With a commitment to offering innovative and comprehensive PPE solutions, Alpha Solway work closely with end users to develop products that are accepted as premium products within the health & safety arena. As a result, the new **C-Series** respirator comes to the market as a superior compact and cost-effective fold flat respirator that benefits from low breathing resistance, a soft foam nose seal and a unique colour coding system, whilst it is also conveniently individually packaged.

Similarly, in their endeavour to meet the specific needs of their market, Alpha Solway previously launched **chem cre8**; a revolutionary system that allowed for the design of a chemical garment to be tailored to the exacting needs of the end user.

They are now proud to announce the launch of their brand new **chem cre8 Garment Builder**; an on- line tool of the same system, that now allows you to create bespoke chemical garments, conveniently at the touch of a button. By simply working through each of the simple steps of this new web tool, chemical garments can now be individually tailored to the exacting needs of your individual business.
